...

Aromatherapy oils are made by extracting the natural oils from various parts of plants. Typically, steam distillation is used to produce the oils. Steam will run through the plant breaking down the cells that carry the oil. The oil and steam are then carried to a cooling chamber where they are separated resulting in the capture of the essential oil.

Essential Oils - Aromatherapy

Essential oils, or aromatherapy oils, are the fragrant essence of a plant. These highly concentrated liquid oils are the foundation of aromatherapy, which is based on the idea that the aromatic oil from a plant has healing properties.
