The papers employ a bottom-up systems approach whereby the

[What is climate change? - David Suzuki Foundation](#)

Climate change occurs when long-term weather patterns are altered for example, through human activity. Global warming is one measure of climate change, and is a rise in the average global temperature. Life on Earth is possible because of the warmth of the sun. While some of this incoming solar

[Economic Impacts of Climate Change | Review of ...](#)

The impact of climate and climate change on economic growth and development is not well understood, and different studies have reached opposite conclusions. New data, preferably longer time series, and the application of the latest econometric techniques should shed new, perhaps decisive, light on these issues.

[Thermometer Rising Climate Change and Canada's Economic ...](#)

The effects of climate change are already being felt, and action to address climate change is being taken now. If it is

on a sufficient scale to address the problem, it is also on a sufficient scale to have a meaningful economic impact.

Climate Change Impacts | Nunavut Climate Change Centre

Climate Change Impact is a way of looking at the effects climate change has on the people and environment of Nunavut, over time. Almost every part of life in the region will be touched by climate change.

The Economics of Global Climate Change - Tufts University

Putting climate change in the framework of economic analysis, we can consider greenhouse gas emissions, which cause planetary warming and other changes in weather patterns, as both a cause of environmental externalities and a case of the

Economic impacts of climate change - Wikipedia

As stated, economic estimates of climate change impacts are incomplete. Analysts have used integrated assessment models to estimate the economic impacts of climate change. These models do include estimates of some impacts, for instance, the effects of climate change on agriculture. In other areas, models exclude some impacts. An example is the possibility that climate change could lead to migration or conflict.

Canada's action on climate change - Canada.ca

Canada is now a world leader in the fight against climate change. We are taking action to reduce emissions, spark innovation and create jobs.
