[Distributed database - Wikipedia](#)

A distributed database is a database in which not all storage devices are attached to a common processor. It may be stored in multiple computers, located in the same physical location; or may be dispersed over a network of interconnected computers. Unlike parallel systems, in which the processors are tightly coupled and constitute a single database system, a distributed database system

[What Is a Distributed Database? Why Companies Switch to ...](#)

[What Is a Distributed Database, and What Are Distributed Data Systems For? May 25, 2014 May 25, 2014 by Adnan Raja \(166posts\) under Cloud Hosting, 0 Comments.](#) Distributed databases offer some key advantages over

centralized databases. Many companies are switching to distributed databases (in which the database, as its name implies, is distributed throughout an array of servers in various

#### **Distributed Database Concepts - Oracle**

In a homogenous distributed database system, each database is an Oracle database. In a heterogeneous distributed database system, at least one of the databases is a non-Oracle database. Distributed databases use a client/server architecture to process information requests.
