[Killer Game Programming in Java](#)

Killer Game Programming in Java is for people who already know the basics of Java. For example, students who've finished an 'Introduction to Java' course. The aim is to teach reusable techniques which can be pieced together to make lots of different, fun games. For example, how to make a particle system, first-person keyboard controls, a terrain follower, etc.

[Game Programming in C - For Beginners - CodeProject](#)

Before we actually jump into game programming, we need to know something called event driven programming. Event driven programming refers to that style of programming wherein the user of the application is free to choose from several options rather than be confined to a predetermined sequence of
