client-centred care, the special role of gender as an

underlying social determinant in shaping the interaction between clients and providers while often acknowledged is still poorly understood and only in recent years received attention.

Who cares? A convergence of feminist economics and ...

2 The term women is used throughout the essay for humans socially identified as female. The authors are aware that the gender spectrum is wider than the binary between men and women and do acknowledge the limitations of the term, yet we choose to stick to it for reasons of linguistic simplicity.

Gender Care: UK specialists in gender therapy

Gender dysphoria is a term describing the distress and discontent experienced by people whose psychological gender is at odds with aspects of their outward physical sex. Such people might identify as gender variant, transgender, transsexual, transvestite, genderqueer, androgyne, neutrois or other. Sometimes, the distress is so strong that they undergo transition from one point on the gender
