In the past I've successfully grown vegetables in multipurpose compost and grow bags but being soilless and peat based they dry out quickly and as highlighted by Gardeners World, contribute significantly to global warming. Peat free organic alternatives are now a readily available alternative which work well in containers.

### **Growing Vegetables in Containers | Miracle-Gro**

Growing vegetables in pots allows you to fudge the growing season by placing pots in an area with a micro-climate. For instance, lining pots along a south-facing wall in early spring warms soil quickly so you can plant sooner. In autumn, a south- or west-facing wall retains heat and can help extend the growing season as frost threatens.
