Atul Sharma, C. R. Chen Abstract Thermal energy storage has always been one of the most critical components in residential solar water heating applications. Solar radiation is a time-dependent energy source with an intermittent character. The heating demands of a residential house are also time dependent. However, the energy source and Solar Boiler - Solar Domestic Water Heating System The hot glycol then transfers heat to the water in the storage tank via the Solar Boiler's heat exchanger. The water is heated repeatedly in this fashion, until the solar tank is hot. The water is heated repeatedly in this fashion, until the solar tank is hot.
