[US Pharmaceutical Innovation in an International Context](#)

Pharmaceutical innovation is an international enterprise. Higher prescription drug spending in the United States does not disproportionately privilege domestic innovation. Conversely, many countries with national health systems and drug pricing regulation were significant contributors to pharmaceutical innovation.

[Defining Innovation - SAGE Publications](#)

Innovation is the process of making changes to something established by introducing some-thing new. As such, it can be radical or incremental, and it can be applied to products, processes, or services and in any organization. It can happen at all levels in an organization, from management teams to departments and even to the level of the individual. This chapter describes the main concepts
