An important issue which arises both in the modelling of linear quantum systems and in the synthesis of linear coherent quantum controllers is the issue of physical realizability. This issue relates to the property of whether a given set of QSDEs corresponds to a physical quantum system satisfying the laws of quantum mechanics.

[Systems of Linear Equations - Math Is Fun](#)

Systems of Linear Equations : A Linear Equation is an equation for a line. A linear equation is not always in the form  $y = 3.5 - 0.5x$ . It can also be like  $y = 0.5(7 - x)$  Or like  $y + 0.5x = 3.5$ . Or like  $y + 0.5x - 3.5 = 0$  and more. (Note:

those are all the same linear equation!) A System of Linear Equations is when we have two or more linear equations working together. Example: Here are
