[How to Cut Crown Molding Angles With a Miter Saw](#)
When using a regular miter saw to cut crown, the fence of the saw represents the wall, and the table below represents the ceiling. So, the bottom of the crown will be the part of the molding that's facing upwards as you make your cut.

[How to Cut Crown Molding | Crown Molding Angles | DEWALT](#)

All DEWALT Miter Saws have a tall sliding fence to support larger crown molding nested vertically against the fence. When cutting with this method, use the crown stops to support material. When cutting with this method, use the crown stops to support material.

[How to cut crown molding with a compound miter saw like ...](#)

Nowadays the compound miter saws have preset angles for crown moldings. But if your saw is manual or there is no preset angle, you can simply do it in a minute. Just rotate the miter saw on the left side or anti clockwise and set the angle at 31.6 degrees. Then rotate the saw again and set the bevel angle at 33.9 degrees.

[miter saw - SawingPros - Your Source For Information on Saws](#)

A miter saw is a great tool to have when you are trying to make angled cuts. It is usually used for making cuts on picture frames, crown molding, window casings and other cuts that you cannot make with a regular saw.

[Cutting Crown Molding on the Flat | ProTradeCraft](#)

The saw blade can be swung 45 degrees, and the blade will slice a perfect compound miter in the crown. The other way to cut the crown molding is to lay it flat on the table and use the bevel adjustments of the blade to dial in the correct compound miter angles.

[How to Cut Crown Molding With a Compound Miter Saw | Hunker](#)

Corner joints in crown molding are "compound" because each cut end has two angles -- a miter angle and a bevel angle. Compound saws are advantageous because the saw tilts to cut the bevel and rotates to the left or right to cut the miter, making both angles with a single cut.

[How to Use a Miter Saw for Crown Molding Cuts](#)

Set the miter saw to the opposite direction in order to cut the other piece of molding which should be placed on the other side of the saw blade. If the corner is less or more than 90°, you need to measure the corner's angle in order to find out the cut angle. Set the saw for half of the angle of the corner rather than cutting the crown molding at half a right angle. For example, if you are [crown molding miter jig | eBay](#)
