[NFPA 101- 2009 Life Safety Code TIA Log No.: 993](#)  
[Reference ...](#)

The 2009 NFPA 101 permits a maximum of 50% of the number and capacity of exits to egress through areas on the level of exit discharge. However, NFPA 101 also has a more specific definition the story at which not less than 50% of the number and capacity of exits discharge to the exterior. It is Schirmer Engineering's opinion , that this definition is intended to be used for construction.

This edition of NFPA 90B, Standard for the Installation of Warm Air Heating and Air- The major change in the 2009 edition was to replace the references to NFPA 255 with ANSIFUL 723 and ASTM E 84, since NFPA 255 had been withdrawn. All three test standards are quite similar. The changes in the 2012 edition were for the purpose of updating the editions of the referenced standards. For the
