order to provide some icons I have a file with the svg data like this: import R

**React Native A framework for building native apps using ...**

The apps you are building with React Native aren't mobile web apps because React Native uses the same fundamental UI building blocks as regular iOS and Android apps.

Instead of using Swift, Kotlin or Java, you are putting those building blocks together using JavaScript and React. **Getting Started React Native - GitHub Pages**

This is not necessary if you are integrating React Native into an existing application, if you "ejected" from Expo (or Create React Native App), or if you're adding iOS support to an existing React Native project (see Platform Specific Code).

**GitHub - fullstackreact/react-native-oauth: A react-native ...**

This library cuts out the muck of dealing with the OAuth 1.0 and OAuth 2.0 protocols in react-native apps. The API is incredibly simple and straight-forward and is intended on getting you up and running quickly with OAuth providers (such as Facebook, Github, Twitter, etc). Since react-native-oauth

**React Native for Designers - Design+Code**

React Native will automatically resize the image when they're used at different places across Android and iOS. Also, when exporting to PNG, make sure there is a background color. Also, when exporting to PNG, make sure there is a background color.
